CLASSIC URANUS STATEMENT:

*"I did not see
that coming!"*

HELLO STAR GAZER,

There is a massive astrological event happening this month – the planet of change and disruption, aka Uranus.

Uranus will change signs for the first time since 2010, moving into the sign of Taurus for the first time in more than 80 years!

I asked some of the most talented astrologers and astrology writers on the planet to answer the question...

What are your broadest brushstroke thoughts about Uranus into Taurus and what it means?

The idea of getting this information out there is to help you to understand one of the biggest astrological events of the year.

Have a great Uranus into Taurus experience!

Yours,

Yasmin Boland

Astrologers included are (in no particular order):

Lynn Bell, Nikki Harper, Aubrey Adams, Samuel Reynolds, Kimberly Dewhirst, Christina Rodenbeck, Tara Greene, Kim Fairminer, Cassandra Tyndall, Joanne Madeline Moore, Alex Trenoweth, Sally Kirkman, Priya Kale (& yours truly)...

LYNN BELL

My broadest brushstroke thoughts about Uranus into Taurus and what it means...

You may think something belongs to you, and then suddenly it may not. Uranus in Taurus changes our relationship with what we have. Nothing can be taken for granted, but this is not always due to external events, it may happen inside of us. What has been important may suddenly not be. In this cycle people can turn away from old pleasures, and look for something out of the ordinary. Then again there may be battles to keep what we value from slipping away. When this is the case, people dig in, passive acceptance becomes conscious resistance. In nature, a new force awakens under our feet. It's power is disruptive, and yet exciting. Something wild to be harnessed and hopefully, mastered.

NIKKI HARPER

My broadest brushstroke thoughts about Uranus into Taurus and what it means...

It's been a very long time coming but are we about to finally see a push for greater global equality? Perhaps.

When Uranus enters Taurus on the 15th May we can be sure of one thing: the establishment is in for a shock. Taurus is a sign traditionally connected with finance, banking and building and Uranus energy is the energy of revolution, upheaval, democracy, radical change and popular protest. In the months ahead, we may see the 1% shaken out of their complacency and greed, as ordinary individuals become empowered to make their voices heard.

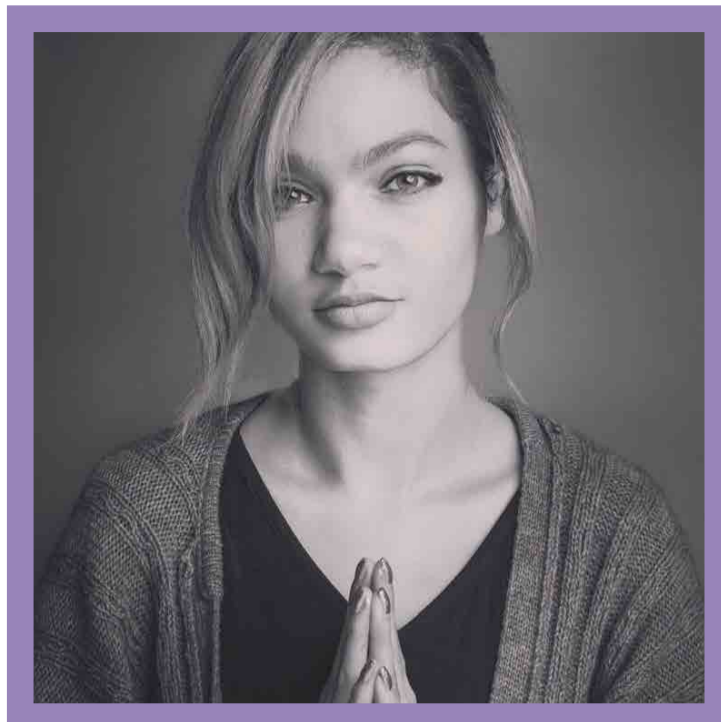

Driven by the decent values that most of humanity shares (Taurus is big on values, remember) change may start to feel unstoppable. Expect social media to play a large part in organising this avalanche of feeling; Uranian energy is nothing if not tech-savvy. There's an environmental feel here too, and a growing recognition that the world needs holistic, innovative, creative solutions not just more of the same old same old. As more and more of us harness Uranus to speak up and speak out, refusing to know our place and refusing to look the other way, the powers that be will necessarily take notice. To channel this potentially explosive energy positively, however, will take some very skilful world leadership. Cross your fingers: it could be a bumpy ride.

AUBREY ADAMS

My broadest brushstroke thoughts about Uranus into Taurus and what it means...

Uranus is moving May 15th and it's a big one. It will move from Aries into Taurus and still 2026. Outer planets make huge collective impacts on our lives. Uranus brings sudden change and bolts of enlightenment. With such a wild planet moving into a stable sign like Taurus, you can expect sudden changes but ones that feel good and supportive of your being. Money, foundations, and your morals will get a shakeup that will bring great wealth. It will talk to Saturn in Capricorn bringing rewards greatly deserved by those who have been working. This is such an epic transit as it brings great appreciation and enlightenment around our earth, material realm, and our bodies. Body love, understanding of our resources, and environmental issues. Our earth and its health directly affects our health and this transit will definitely bring this to our attention. Uranus also brings enlightenment through awareness. Your 6 senses will definitely be heightened and you will feel more connected not only to your physical senses but your spiritual senses as well. Uranus can be a very spiritual planet and your sight, smell, touch, hearing, and taste have spiritual aspects to them too. For example, you can see the chair you're sitting in. However, even the chair has an energetic aura to it. This very beautiful transit will lead you to a level of appreciation of the world around you that you never knew existed.

SAMUEL REYNOLDS

My broadest brushstroke thoughts about Uranus into Taurus and what it means...

Astronomers recently reported that the planet Uranus

is loaded with hydrogen sulphide, the same gas that rotten eggs emit. You'd hope that unpredictable Uranus moving into Taurus, a sign ruled by sweet Venus, on May 15th, would become sweeter and bring less noxious changes in our lives. But surprising stinker planet will likely be only as pleasant as someone not doused in enough cologne to cover bad body odor.

In other words, Uranus will bring a less pungent funkiness in our lives. Yet, still funky. There's a good and bad side to that. The good is that bursts of change will likely happen slower and with more long lasting consequences. More like slow tectonic shifts rather than an earthquake breaking beachfront off into the sea. We might read stories of sweeping political changes that inch along over weeks or months rather than regimes toppled overnight.

The bad is that these changes are likely to be more entrenched, whether good or bad. That's because Uranus in Taurus will surface events and experiences that have long taken root in our minds and hearts. They just haven't come from nowhere. Our own funk has just taken some time for us to sense.

KIMBERLY DEWHIRST

My broadest brushstroke thoughts about Uranus into Taurus and what it means...

The first thing that comes to my mind for the Uranus in Taurus cycle is the digitization of money! PayPal,

bitcoin, cryptocurrencies – all practical solutions for online transactions; our attitude towards assets and property measured in the digital realms is about to become a greater topic of interest, with giant leaps and advancements for our ‘net worth online’ and earnings, in store.

China introduced the Social Credit System at the end of Uranus in Aries, and our web presence – our social media or digital profile – has become an accepted means of individual participation and existence. Up next could be what each person has to offer, what value they hold, what role they play in the collective.

Agriculture and ways of farming could be revolutionized with ground-breaking developments for food consumption, as well as our relationship to sensory experiences. Online shopping and buying through apps will be more relevant than brick and mortar; cash could increasingly peter out. People will increasingly be able to make money more easily online.

As Uranus sparks the imagination from its place in Taurean skies, a bigger conversation could evolve around ‘what’s owed’; people could become more impassioned and demonstrative around equal pay, fair employment practices and changing up usual ways of working – three day weekend anyone?!

CHRISTINA RODENBECK

My broadest brushstroke thoughts about Uranus into Taurus and what it means...

1. Revolution in how we pay — eg cash, plastic, electronic transfer. Could we go back to gold standard — or shoot forward to crypto world? Take a look right now at China which is re-establishing a gold standard.
2. Radical simplicity, liberation through nature and being “natural”, liberation through working the land, equality of labour. All these ideas will become popular again. More preppers and back to the land movements than ever.
3. Innovative ways of cleaning the planet, innovative agricultural methods.
4. Ecological problems will accelerate. There may be more events like the American Dust Bowl of the Dirty Thirties, which came about during the last Uranus in Taurus.
5. Maybe also cybernetics will become more commonplace. Actual implants. Something about the human body being re-engineered.
6. On a personal level, potentially very exciting — liberation from fixed, old beliefs about the body, beauty... A new emphasis on radical self-sufficiency.

TARA GREENE

My broadest brushstroke thoughts about Uranus into Taurus and what it means...

A huge change is coming- a 7+ year mini-Age that hasn't happened in 84 years. URANUS the planet that orbits at a 90-degree angle enters stable stubborn Taurus on May 15th. From 2018-2026 new technology will become part of our everyday life and our bodies through microchipping. Robots take over AI will rule-sex robots; "Sophia" Virtual reality and cryptocurrencies/blockchains too.

Uranus governs Hi-tech; revolutions; freedom; equal rights for all; Higher consciousness and chaos. Uranus is like being hit by lightning which can be destructive or can bring enlightenment. In Greek myths Uranus castrated Saturn in Greek myths. The Patriarchy will be toast by 2026. Taurus is a Fixed earth sign which resists change. It rules the throat and music the arts and singers. It is stable sensuous and loves beauty jewellery and luxury as its ruled by VENUS. Taurus rules resources-what "I have." Like Real Estate all tangible goods the stock market -bull market and gold. This also means earth changes earthquakes lightning strikes and societal upheavals.

In Yoga Uranus's energies are called Kundalini. This is the actual electrical spiritual energy coiled in the base of the spine which brings enlightenment. Many people will have spontaneous enlightenment.

Resistance to change for all Tauruses will be challenging. All earth signs - Virgo and Capricorn too - will be affected by positive aspects. Scorpio will be challenged as Uranus will opposes it. Leo and Aquarius will also be affected by hard squares. Get ready to break free and boldly go to places unthought of before.

KIM FAIRMINER

My broadest brushstroke thoughts about Uranus into Taurus and what it means...

What will surprise-packet Uranus bring to the serene sign of Taurus? Uranus breaks to breakthrough. Taurus is a Venus-ruled Earth sign so the revolution comes to the material and sensual world. Technological advancement and progressive leaps will focus on solving tangible problems, such as environmental degradation, increasing agricultural yield, reducing waste. Digital art is likely to gain legitimacy. Advances in sustainable fibre technology will flow on to fashion. Micro fibre will be phased out. People will choose quality garments that last, over wasteful 'fast fashion'. Advances in virtual reality and robots, perhaps even as substitutes for intimate human relations.

Our delusions about stability and security will be shattered through increased seismic activity as the Earth cries out for an end to environmental exploitation. Technological advances around the extraction of 'earth energy' leading to an end on reliance of on fossil fuels and fracking, and a move to renewable sustainable sources of power.

These changes will come about in part due to the decentralisation of economic structures, as cryptocurrency goes mainstream, but also as financial institutions recognise the economic risks of climate change and invest accordingly.

Awareness of the impact of our pleasures - food, consumerism, investments, lifestyle choices - on our bodies and the planet, will lead to more conscious choices being made at both an institutional and personal level.

CASSANDRA TYNDALL

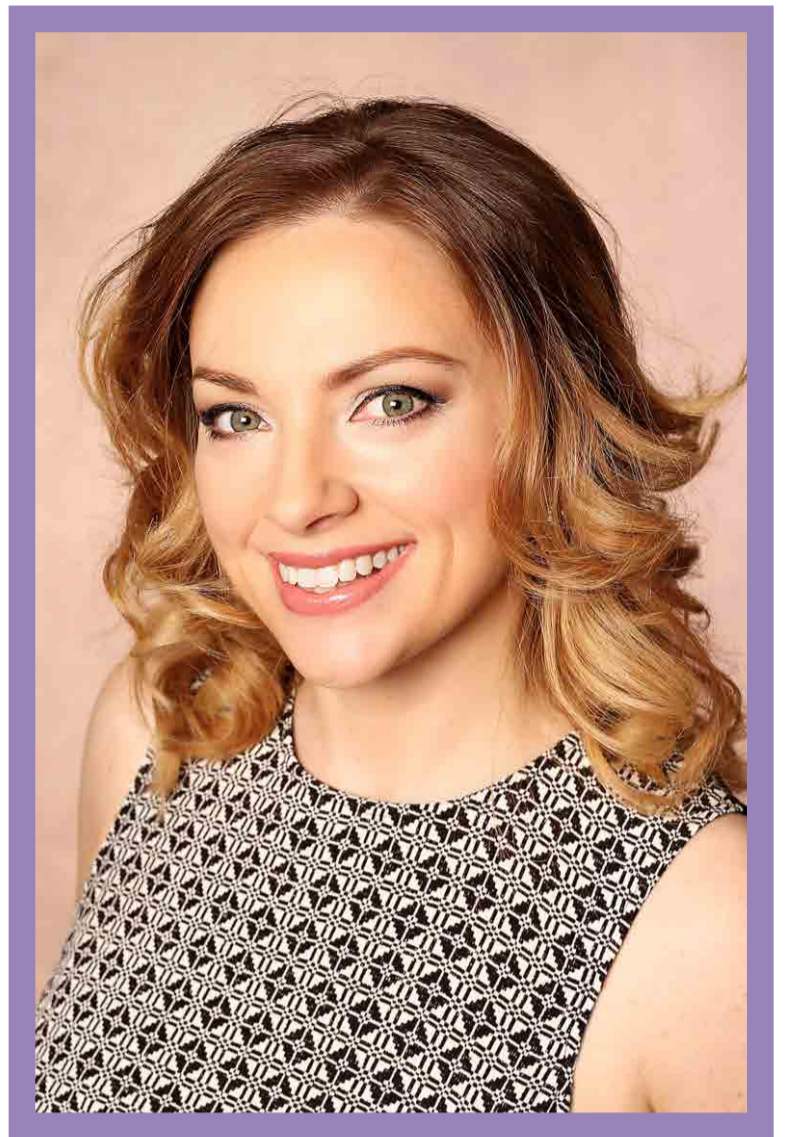

My broadest brushstroke thoughts about Uranus into Taurus and what it means...

Since 2010, Uranus in Aries delivered a series of disruptions, shocks and surprises. These may have manifested in the form of minor tremors, or massive earthquakes, depending on your unique relationship with the sign of Aries. By now, you'll have learned that life isn't about

anyone else's pace, permission or approval. Discovering and unleashing your authentic self and walking along your personal path less travelled may have caused separations from what you once held dear, either in your heart or in your life. What may have been lost has brought new forms of self-expression that has liberated you.

Uranus' passage through "I want" Aries has helped you clarify your desires. The next challenge will redefine what you value while Uranus tours "I have" Taurus until 2025. Taurus dislikes change. In fact, the bull actively resists it. Uranus will shake things up, redefining your comfort levels and your relationship to the physical world. Your mission, if you choose to accept it, is to recognise your stubborn streak, and seek to bend rather than break. By the time Uranus is ready to enter Gemini, you'll have learned about money and survival and what is it you truly need to find simplicity and peace.

JOANNE MADELINE MOORE

My broadest brushstroke thoughts about Uranus into Taurus and what it means...

Uranus is the planet of revolutions, disruptions, changes and autonomy. And Taurus rules finance, banking and material possessions. So globally, prepare for major stock market and real estate volatility. And expect some shocking revelations about the behaviour of banks and financial institutions. Personally, find practical ways you can gain more financial freedom. Can you sell property or shares to boost cash flow? Or earn extra money doing something you love, in your own highly individual way? Liberate yourself from too many possessions. Keep only the things that are useful and/or beautiful, and get rid of the rest.

Taurus also rules food, farming and cooking. So a Back-To-Basics and Down-To-Earth philosophy will work best over the coming years. Be more self-sufficient and grow your own produce. Even if it's just a few tomatoes and herbs on your balcony. Become a member of a neighbourhood community garden. Bottle jams and chutneys. Bake your own bread and biscuits. Make fermented foods like yogurt and pickles. Join a food co-op or visit a farmers' market. Enjoy eating local produce, as you become less dependent on the multinational supermarket chains. Being a Bohemian Food Goddess is one of the most revolutionary things you can do as Uranus moves through Taurus.

ALEX TRENOWETH

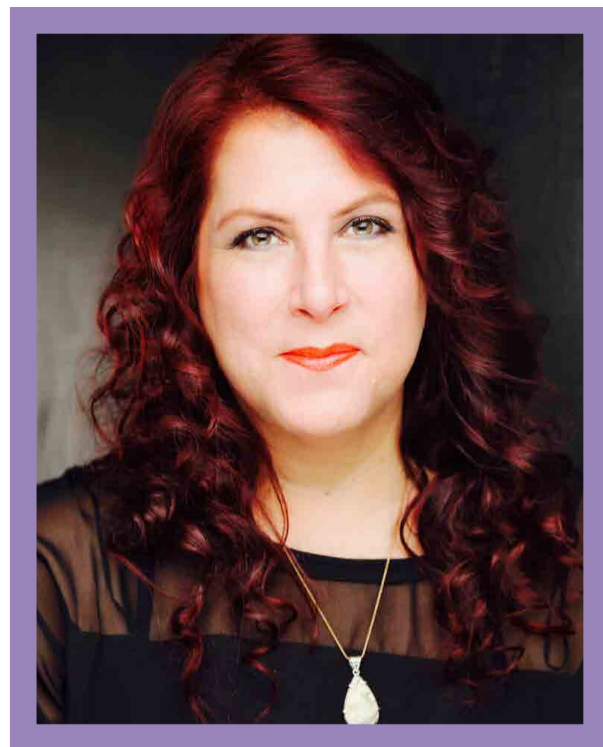

My broadest brushstroke thoughts about Uranus into Taurus and what it means...

It is time for the British to begin revolutionising the way we educate our children. With the ingress chart set to London, it can be seen whole manner in which we communicate, learn and trade will hinge on technology. Teachers, as we understand them, may become a thing of the past as virtual classrooms make physical school buildings and books obsolete. Children will be free to learn at their own pace and will be encouraged to become independent thinkers. They will finally be allowed to think beyond the constraints of the less technologically sophisticated adults. Will this be a good thing? It certainly will change the way we relate to each other.

As a collective society, we need to ensure our Mother Earth is allowed to recover from the abuses of her offspring. And it just might be the children born during these next eight years whilst Uranus is in Taurus who help us to see the way to healing.

The Royal family, so connected to the fixed star Algol, is also likely to feel the pressure of change. This may be particularly felt as Uranus transits that New Moon on Algol towards the end of 2024!

SALLY KIRKMAN

My broadest brushstroke thoughts about Uranus into Taurus and what it means...

Uranus, the planet of change, moves into Taurus, renowned for its dogged and stubborn nature. This already indicates a clash of different natures and some changes over the next seven years will be sudden and dramatic.

Taurus is an earth sign, linked to nature, also food, produce and growth. Food banks are on the rise, 'avocado anxiety' (finding a ripe avocado) is a major first world problem and sustainability and climate change are going to rocket up the list of world priorities.

Taurus is the builder and represents money; Uranus rules technology and all things modern. Digital currencies are exploding, a market correction of property prices is on the cards and you can't rule out another financial crisis. Crowd-funding will become mainstream.

In the past, Uranus' move into Taurus coincided with the birth of industrialism. Therefore, we can expect huge innovations in manufactured products, robotic engineering and modern conveniences.

Art and design could enter an exceptional, new-wave phase and the internet will undergo a serious overhaul. Uranus in Aries was the era of the 'selfie' (Aries rules the head); Uranus in Taurus is the era of the 'collective voice' (Taurus rules the throat).

PRIYA KALE

My broadest brushstroke thoughts about Uranus into Taurus and what it means...

We could all be singing: “I feel the earth move under my feet...” as Uranus the planet of innovation, revolution, and the unexpected, enters Taurus this May.

Over the next eight years expect ground-breaking developments in field of physics, digital currency, environmental conservation, genetic research, and how experience our material world, among others. Questions surrounding “values” — collectively, and individually — will be a central theme, and backdrop to life.

In the area of your life ruled by Taurus, if it feels like you’ve touched rock bottom, in reality you haven’t scratched the surface of the potential. Life is pushing you to dig deeper and venture beyond your comfort zone into new pastures.

What and whom do you value, and why? Money can’t buy you love or anything of true value; at most it can buy you freedom. Your skills, talents, connections, are all your resources. Invest and nurture what you value, be innovative, inventive, creative, and you’ll be amazed at the tangible results.

Commitments too will be tested: pushing some over the edge, and other sudden new relationships blossoming. You cannot possess another; the more freedom you offer, you can deepen bonds that share your values.

Importantly: Taurus rules the body; Uranus’ energy is like electricity, or lightening – it follows the path of least resistance and

needs to be harnessed. No matter how fancy a lamp, without power it won't give light. A daily meditation practice is a necessity now to your well-being, ability to remain grounded, and plugged in. Allowing you to feel liberated, rather than shocked by developments.

We're learning lessons of detachment from the material world. We needn't all become monks, but recognize everything material is transient.

Enjoy each delicious moment, but remain detached. Then you can experience the true sense of self-worth and security — materially, emotionally, and in your commitments – you crave, and watch your life flourish.

YASMIN BOLAND

My broadest brushstroke thoughts about Uranus into Taurus and what it means...

The most obvious thing I think we can all predict with the move of Uranus into Taurus in mid-May is a shake-up in the money market, especially but not only where cryptocurrencies are concerned. But there is more to it than that. For one thing, Uranus is the Great Awakener so it's very likely that there will be changes that run very deep about money, as more and more people realise they have been living their lives somehow trapped by dark, controlling governments (Pluto in Capricorn). There is a rebellion building. There are changes in values. Digital ventures are going to become more lucrative. If you can put it online, you can monetise it. (Astrology online is going to explode even more.) Online dating will too, even more as people are liberated from any shame around it. Working for yourself will become even more normal too. Expect also, more massive #metoo style developments. Women's roles are still changing radically, think Women's Liberation For The New Millennium. Interesting times!
